Re: Breakout for ventilation purposes in Mine No. 1

Dear Mr. Zumwalt:

Your proposal for minor modification of your No. 1 Mine plan submitted to DOGM April 28, 1988, has been reviewed by this office.

A breakout for ventilation purposes will assist in proper ventilation and is in the best interest of obtaining maximum economic recovery of coal resources in the Skyline No. 1 Mine.

Modification of your mine plan is granted to allow for mining up to the outcrop in the First Left Bleeder section. Actual breakout approval must come from Utah Division of Oil, Gas, and Mining.

This office also requests a copy of your ventilation map for Skyline Mine No. 1 to be submitted at your earliest convenience.

If you have any questions regarding this modification, please contact Jeff Cundick, staff engineer, at 637-4584.

Sincerely yours,

MARK E. BAILEY

Area Manager
