January 17, 1992

1~

Dear Mr. 2~:

Re: Changes in the Utah Administrative Code

The Division of Administrative Rules is making a change in the 1992 Administrative Code, effective January 1, 1992. The portion of this change involving the Coal Regulatory Program is a rule prefix number change from R614 to R645. Only the prefix number will change. All sections and subsections will remain as they were previously numbered.

The new 1992 Administrative Code incorporating the new numbering system will be available in mid-February. Prior to the general availability of the 1992 Administrative Code, the Division will cite violations as follows R645(614). After the date that the 1992 Administrative Code becomes generally available, the Division will use the R645 prefix in all citations.

Prefix changes to approved permits should be made by submitting a signed copy of the attached letter amending the approved permit to read R645 at all locations approved to read R614. All future requests for new permit applications, reformatted permit renewals, and permit changes to approved permits in the Coal Regulatory Program should read R645.

Thank you for accommodating this change.

Sincerely,

Lowell P. Braxton  
Associate Director, Mining
