RE: Disposition of NOV N93-32-3-8, 2 of 8 and 8 of 8, Sunnyside Coal Company, Sunnyside Mines, ACT/007/007, Folder #2 & #5, Carbon County, Utah

ANALYSIS

The remedial action required under the provisions of NOV N93-32-3-8, 2 & 8 of 8, requires Division approval of drainage designs prior to implementation. As dictated by the Modification of Notice of Violation NOV N93-32-3-8, 2 & 8 of 8, the operator must submit designs by November 22, 1993 and implement the drainage designs within thirty days of Division approval.

The operator has submitted (received November 22, 1993) the drainage designs to the Division. Currently Mr. Tom Manson (Reclamation Hydrologist) is reviewing the information to determine its technical adequacy and compliance with the appropriate portions of the R645 Coal Mining Rules. The Division will terminate the violation at such time when approved drainage designs, which meet the of the R645 Coal Mining Rules, are adequately implemented in the field.
