Inspection Memo
to Coal File

RE: U.S. Steel Corporation
Wellington Coal Preparation Plant
ACT/007/012
Carbon County, Utah

On August 31, 1982, a partial inspection was conducted at the above mentioned facilities by Ken Wyatt of the Division. Randy Watts of U.S. Steel Corporation accompanied this inspector.

The purpose of this inspection was to examine for the removal of sediment material excavated from the ponds north of the railroad tracks. This material had been piled along the edge of ponds during spring. The majority of this material had been removed since the last inspection.

No problems were observed.
