Re: Hidden Splendor Resources, Inc. / Notices of Violation Numbers 10140, 10141 and 10142 ("NOV's")

Dear Mr. Haddock:

I am writing to request additional time to conduct the abatement work in connection with the above captioned NOV's. While Hidden Splendor has made significant progress on the items listed in the applicable NOV's, given Hidden Splendor's condition, additional time is required to address these items. Attached you will find a few photos which evidence the work being done to address the drainage issues identified in the NOV's. And I understand the monthly inspection of the site was conducted yesterday and your inspector can confirm that work is in fact being done in connection the required items.

With regard to any concerns surrounding the settlement pond, I note that the pond currently is completely dry due in no small part to the fact that there has been no discharge of water from the Horizon Mine for well over a year. While there may be some issue regarding the level of the sediment in the pond, the pond has been capable of containing any runoff from any rain storms which appear to be the only source of water into the pond. Accordingly, there appears to be little to no chance of overflow from the pond while additional work in connection with the pond is undertaken.

For these reasons, Hidden Splendor requests an additional thirty days in connection with the abatement of the above captioned NOV's.

Please feel free to contact me with any questions or comments you may have.
