Re: Coal Exploration License Application UTU-76864, Modification and Clarification of Drill Site Locations.

Dear Mr. Lopez:

On June 3, 1998, on-site visits were made by U.S. Forest Service, B.L.M., and Canyon Fuel personnel to a number of drill sites proposed in Coal Exploration License Application UTU-76864. During this on-site visit, locations of two proposed drilling sites were altered to avoid crossing Boulger Creek with access roads. These holes include 98-4-1 and 99-4-1, located in section 4 (see attached map). As a point of clarification a third hole, 98-21-1, in section 28 was relocated such that no surface disturbance will occur on the downhill (south) side of the road adjacent to Swen's Creek. Relocation of 98-28-1 will be such that the drill site will be located on and slightly north of the road. We request this modification be made to our original application dated December, 1997.

Your work on this exploration license is appreciated. If you have questions or require further information, please call me at 435-448-2633.

Sincerely,

Mark Bunnell
