RE: Gooseberry Exploration Seed Mix, Canyon Fuel Company, Skyline Mine, ACT/007/005-97M, Folder #2, Carbon County, Utah

On August 25, 1998, I received a telephone call from a dealer supplying seed for the referenced project. He indicated seed of two species in the approved seed mix, showy goldeneye and sticky geranium, are in extremely short supply and that it would be impossible to furnish the seed. I told him to substitute sweetanise (*Osmorhiza chilensis*) and Rocky Mountain penstemon (*Penstemon strictus*) at the rates of one and one-half pounds pure live seed per acre, respectively, for the species he could not provide.
