RE: Sunnyside Cogeneration Associates - Violation No. 93-13-1-1

Dear Randy,

On November 5, 1993, Sunnyside Cogeneration Associates requested a 30 day extension for the abatement of Violation No. 93-13-1-1. The Division of Oil, Gas and Mining responded with an extension until November 16, 1993. The violation was issued for failure to identify and describe all mining and related activities within the permit area.

Eleven days is not adequate time to provide the information required to fulfill the requirements of this violation. As DOGM is aware, there are in excess of forty certified drawings contained in the SCA Permit Document. In order to change all of these drawings to incorporate a permit boundary change, it will take a significant amount of time. Additionally, the crusher facility will require a field survey and detailed site plan and the SCA Permit Document will also require updating.

SCA is requesting an extension for this violation until December 15, 1993. If you have any questions, please feel free to call.

Sincerely,

AEB for
