Subject: Re: Covol/Wellington

Good Morning,

You may recognize the operation being modified by us as formerly owned and operated by Terra Systems. Covol acquired the Wellington plant, and the public comment period you refer to relates to an increase in production.

If the public notice does not contain enough information for your use, we have a fair amount of information we could pass along. For starters, the Intent-to-Approve document is available at http://www.airquality.utah.gov/PERMITS/Pc_nsr.htm - Look for the company name Covol and the PDF link to the right. It contains the contact information you asked for.

Please let me know what else you might need.

Regards,

Timothy DeJulis

>>> Pam Grubaugh-Littig 5/31/2005 1:52 PM >>>

There was a public notice in the Sun Advocate on May 19, 2005 about a NOI for Covol to construct and operate a coal preparation plant.

I work with the Utah Division of Oil, GAs, and Mining in the Coal Regulatory Program and Covol has not approached us with a "coal preparation plant". Perhaps it was a poor choice of words in the public notice.

Would you please give me a name of someone who I can call about this project? Also, if you have any information that you could e-mail me, that would also be greatly appreciated.

Thank you. Pam
