Mr. W. John Borla, Associate Engineer
Plateau Mining Company
P. O. Drawer PMC
Price, Utah 84501

Dear Mr. Borla:

Re: WTP Plans and Specifications

We've received your June 6, 1983 submittal regarding the proposed installation of Culligan water treatment equipment. In our letter of May 19, 1983, we had commented on your previous submittal of information related to the proposed installation. In that, you were advised that complete plans and specifications were needed in order to complete our review. The amount of detail needed must be sufficient to allow a review for compliance with the Utah Public Drinking Water Regulations.

The information now submitted still does not provide the required detail as it is not the fabrication drawings requested, but is basically catalogue sales brochure data. You will find enclosed Sections 8 and 9 of the referenced regulations which should be referred to when preparing the required plans.

In addition, the questions posed on the need for the equipment also have not been addressed. This will need to be resolved to assure the treatment concept is adequate.

Finally, as is for all public water supply systems, the final plans and specifications must be stamped and signed by a licensed professional engineer in accordance with Section 2.1.4 of the referenced regulations.

Sincerely,

Michael B. Georgeson

Michael B. Georgeson, P.E.,
Chief, Engineering
Bureau of Public Water Supplies
