FROM: D. Wayne Hedberg, Reclamation Hydrologist DWH ACT/007/006

SUBJECT: Plateau Mining Company/Getty/Mining Company, Unit Train/Load Out Facility

This memo is forwarded to you to solicit you technical assistance in reviewing Plateau Mining Company's latest revision concerning a new Unit Train/Load Out Facility at the Star Point Mine site.

It is my preliminary determination that this proposal will need to be received as a new permit by virtue of an additional twenty-five (25) acre permit area boundary change. There is only 8.5 acres of new disturbance proposed.

Shannon Storrud has "volunteered" to be the lead on this project and he will be responsible for coordinating the Determination of Completeness review with the other team reviewers and the other State and Federal Agencies.

A tentative target date for reaching a decision on completeness of the submission is set for February 10th, 1984.

There are only two (2)-three (3) volume copies of the plan in our possession, so it is important not to have the proposal sitting idle in your office. Please pass it on to another team member if you get tied up with another priority item.

Thanks.
