Signs & Markers. Signs and markers were observed at the mine site, the sediment pond, the haul road, and the waste rock site

Diversions. A drop drain near the upper non-coal waste storage site needs additional housekeeping. Cows have destroyed straw bales adjacent to the drop drain. Straw needs to be cleaned so runoff will not transport the straw into the drop drain

Sediment Pond. Pond contained about 2' of water in the area of maximum depth.

Cessation of Operations. The operator is in temporary cessation. All portals have been sealed and not backfilled. Beltlines into the portals have been cut.

Other sediment control. The straw bales partially destroyed by livestock mentioned above should be replaced

Roads. The ancillary road going to the Beehive Portals needs some housekeeping. The road is passable by vehicles, however, some rocks have fallen from the cliffs above. Rocks need to be remove for improved vehicle travel

The beltline project on the haul road has been returned to the operator. Requested the operator resubmit his amended proposal within 30 days ie, 11/8/92.

Roads

Drainage controls. The road drainage system above the shop meets requirements for ancillary roads. The roads were reclassified and approved by the Division

Reason For Amended Report

Items 16 Roads, Drainage Control & Surfacing were observed in the field and notations made in the inspectors field notebook. However, the boxes on page 1 were not checked as a result of an oversight

This situation also applies to items 17 & 18, page 1. The appropriate boxes have been checked and reflected in this amendment
