Memo

To: John Whitehead

From: Bob Lauman

Subject: New Lands Section 18 at Cypress Plateau; 1987 drilling authorization

On top of ridge we proposed to drill first hole at an angle - last hole at 530'. Then flew first driller to second site in canyon. Hole down 600' have about 250' to go. Tremendous problem with driller, question as to whether he will complete hole.

Engaged second driller last Wednesday, on site Thursday, completed hole on Sunday afternoon at first location.

I requested the second driller move down the slope to the NE to pick up another hole, third site. Since this site ~~have~~ has not been included in either of the letters 1986, 1987 we will be submitting an exploration request after the fact.

Bob Lauman
