INSPECTION REPORT COMMENTS

Permit No. ACT/007/006

Inspection Date _____

Please number comments to correspond with topics on previous page.

Permit. NOV. 88-26-15-1 of 3 was issued in part for not having approval by the Division for not passing runoff through a sediment pond. This part of the NOV was extended to 12/30/88 providing the operator ~~to~~ an opportunity to submit a proposal for a permit modification to include all such areas in a small area exemption (817.42(a)(3)). The cited regulations provide guidelines for small area exemptions. As a suggestion the operator should (a) count all such areas since these areas were designated in the expired permit, but as a result of a joint oversight were not included in the permit renewal (b) Each disturbed area not reporting to a sediment pond, with exception of item cited in 817.42(a)(4) should be included in the proposal

(c) The proposal should include (a) a map or a cutout map showing each area, (b) a table showing the number of acres in each area and the type of alternative sediment control use ie straw bales, silt fences, check dams, vegetation or combination of several, and (c) short statement on why such areas cannot report to a sediment pond.

This is a suggestion and the operator may elect to submit the suggested information in any format that would meet his needs.

Sediment Ponds. Most of the sediment ponds contained water. All ponds requiring cleaning have been cleaned. No problems were noted with the exception that one inlet on pond 3 needs some riprap, ie., additional riprap as a preventative measure.

Coal Processing Waste. The operator has started to drill another hole for the 4th piezometer on the coal refuse pile. This task has not been completed because of drilling activities
