Subject: PE Certification - Must Be Licensed in the state of Utah

Coal Operators -

There have been questions about using an out-of-state PE stamp to certify maps required for Utah coal mine applications. The professional licensing regulations, Title 58, Chapter 22 of the Utah Code Annotated [or Utah Code Ann. § 58-22 et.seq.], for professional engineers (PE) and professional land surveyors clarifies this question. The statute is clear, the PE must be licensed in the state of Utah.

I have attached a memo that clarifies this issue. This memo is for your information.

Any questions, please call me.

Thank you.

Pam

RE: Professional Engineers and Professional Land Surveyors - Must Be Licensed in Utah to Stamp Designs and Maps for Coal Mine Applications

There have been questions about using an out-of-state PE stamp to certify maps required for Utah coal mine applications. The professional licensing regulations, Title 58, Chapter 22 of the Utah Code Annotated [or Utah Code Ann. § 58-22 et seq.], for professional engineers (PE) and professional land surveyors clarifies this question. The statute is clear, the PE must be licensed in the state of Utah.

Pursuant to Utah Code Ann., § 58-22-305(1)(a)(ii)(B), the PE "may not provide professional engineering, professional structural engineering, or professional land surveying services in the state until licensed in the state." Further, section 58-22-602 states that "any final plan, map, sketch, survey, drawing, document, plat, and report shall bear the seal of the professional land surveyor licensed under this chapter when submitted to a client or when filed with public authorities."

If you have any questions about how to license in the state of Utah, please go to <http://www.dopl.utah.gov>.

Thank you.
