INSPECTION REPORT COMMENTS

Permit No. ACT/007/006

Inspection Date 2/10/89

Please number comments to correspond with topics on previous page.

Permit Two MRP amendments were approved by the Division which are described as follows

1/6/89 - Sediment Control On Small Area Exemptions

1/11/89 - Amended Underground Mining Sequence

Diversions. Disturbed drainage diversions were observed; however because of the below freezing temperatures little runoff was underway. No evidence of blocked culverts was observed on this inspection

Sediment Ponds Sediment ponds along the main road to the portals were observed and no problems were noted.

Coal Processing Waste The operator pointed out the area where the piezometer had been drilled and installed on the refuse pile. This is where the Price River coal was being stored.

Road Maintenance. The roads were wet and snow covered at the upper end of the mine site. The operator stated they use a sand & salt mixture on the mine roads in the winter season

Copy of report mailed to CYPRUS-PLATEAU MINING CO - Ben Grimes SLC For: OSM/Brian Smith; DOGM/Joe Helfrich

Copy of report ~~given~~ filed to DFO
