Gentleman:

Enclosed are the monthly discharge reports for the Deer Creek, Trail Mountain, Cottonwood/Wilberg mines and the Hunter Coal Preparation and Blending Facility for the month of May 2010. All other parameters were in compliance with UPDES permits except the TSS for 7 day average and 30 day average at the Deer Creek Sediment Pond. Each Spring the pond has a thermal induced rollover which causes the sediment to stir up. Our response to 5/5/10 high sample was closing the discharge valve for a week, to let the sediment settle. Results of the 5/5/10 TSS sample were not available from the lab until the 7 day average timeframe had passed. Later in the month (5/13/10), the valve was opened again and another sample collected in hopes to lower the 30 day average. The sample was lower (16 mg/L, but when averaged with the previous sample (30 day average was 26.5 mg/L), was just above the compliance limit of 25 mg/L.

If you have any questions concerning these reports, please feel free to call Guy Davis at (435) 687-4711.

Sincerely,

H. Earl Snow
Mine Manager

Comments and explanation of any violations:
Sample oil and grease only when a sheen is observed, or there is another reason to believe oil is present. Fill in N/A when a test is not performed. 1st total Fe sample was collected at a questionable location (1.66 mg/L). A 2nd sample was collected at the usual sample location with a Total Fe result of 0.94, which is in compliance.
