INSPECTION REPORT COMMENTS

Permit No. ACT/007/006

Inspection Date 9/19/90

Please number comments to correspond with topics on previous page.

1. All permits and records were found to be in order. Permit stipulations were completed and approved. The reclamation bond is for $3,407,322. ~~The last~~ No haul roads are located on the mine site. The operator was advised that under the new rules primary roads require certification.

4.b. Due to the recents rains almost all diversions were running water and functioning properly. The culvert above sediment pond 4 had split at a joint and water was running under and over the surface. The operator repaired the culvert within 2 hours and the culvert was inspected and functioning. The operator stated that the moderate size rills and gullies will be repaired.

4d. All sediment ponds contained water, only Pond 8 was discharging. Pond 3 was recently cleaned and the operator was in the process of cleaning Pond 2. Pond 8 will be cleaned next week.

CLEANED 11/26

The silt fences near the Silo should be cleaned, although they were fully functional at the time of inspection. The check dam by the Sample Building should also be cleaned.

4.e,f. All water monitoring data was in order. The second quarter NPDES reported no discharge.

5. The last recorded on-site blasting was on 12/20/89.

13. The test plots established in 1989 were looked at. Vegetative growth appeared good with many seedling shrubs. Evidence of deer use was observed.

4b. The operator was reminded of Mr. Mansons' (Division Hydrologist) request for a maintance plan for Diversion 16. The operator said he would begin to work on the plans soon.
