November 11, 1992

Mr. Ben Grimes
Cyprus Plateau Mining Corporation
P. O. Drawer PMC
Price, Utah 84501

Dear Mr. Grimes:

Re: As-Builts for the Gentry Mountain Air Shaft and Information for the Exploration, Star Point Mine, Cyprus Plateau Mining Corporation, ACT/007/006, Folder #2, Carbon County, Utah

Due to the fact that the BLM did not witness the completion of exploration and the air shaft, it will be necessary to submit the final as-builts for the Gentry Mountain air shaft for inclusion in the PAP. It will also be necessary to submit the finalized information (completion data) for the exploration holes. Additionally, the BLM told the Division that one of the holes was converted to a water monitoring hole, which the Division was not aware of until that time. The location of this hole, the completion records, and what information will be gathered from this hole, which the Division assumes will be for baseline information, must be submitted to the Division by December 11, 1992, to update the PHC document.

In the future, it is requested that Cyprus Plateau Mining Corporation notify the Division within 30 days of drilling a water monitoring hole, as to the exact location where the hole will be drilled. Additionally, it is requested that Cyprus Plateau Mining Corporation submit detailed information, to be included in the PHC, as to how these water monitoring holes will be installed and/or completed, tested and monitored.

Sincerely,

Pamela Grubaugh-Littig
Permit Supervisor
