Dear Mr. Braxton:

The Fish and Wildlife Service (Service) has reviewed the Determination of Completeness Notices received for the Castle Valley Ridge Lease addition to the Star Point Mine (received March 3, 1993) and for the AEP Lease addition to the Centennial Mine (received March 12, 1993).

The Service has no comment on these projects at this time. We assume that DOGM, in coordination with the Office of Surface Mining, will consider potential effects of the projects on listed threatened and endangered species, including water depletion effects on Colorado River fish species, during the technical review process.

If we can provide any assistance in making a determination, please contact Susan Linner, Fish and Wildlife Biologist, at (801) 975-3630.

Sincerely,

Susan C. Linner

Dear Mr. Johnson:

Re: Five-Year Permit Renewal and Castle Valley Ridge Tract Addition, Cyprus-Plateau Mining Company, Star Point Mine, ACT/007/006, Folder #2, Carbon County, Utah

The permit states that no threatened or endangered plant or animal species or their critical habitat occur within the permit area and proposed lease (see attached).

If this statement is still current, please sign, date and return this letter. If this statement is not current, please send the Division a current species list of endangered or threatened plant or animal species which could potentially be in the permit area.

Thank you for your attention to this matter.

Sincerely,

Pamela Grubaugh-Littig
Permit Supervisor
