Subject: 2014 Annual Report Review Completion, Savage Coal Terminal, C/007/0022, Task ID #4795

Dear Mr. Nielsen:

The Division staff has completed the review of the 2014 Annual Report. Enclosed is a copy of the review with each reviewer's comments completed on June 30, 2015.

Thank you for your diligence in completing the Annual Report. If you have any questions, please call me at (801) 538-5325.

Sincerely,

Daron R. Haddock
Coal Program Manager

OPERATOR COMMENTS

Reports included in Appendix A

REVIEWER COMMENTS ☒ Met Requirements ☐ Did Not meet Requirements

Appendix "A" contains four quarterly inspections with P.E. certifications by Mr. Dan Guy, Utah registered professional engineer for the Savage waste rock / refuse pile. None of the four document identifiable hazards or signs of instability. The pile was recovered as part of a BTU resource recovery operation approved by the Division. The October 28, 2014 inspection report notes that there was only a small amount of material remaining (2 double trailer truck loads, approximately 80 tons). As this volume is very small, all R645 regulatory requirements relative to slope stability, compaction, drainage control, etc., are inapplicable. All drainage controls were removed during the recovery of the pile. The MSHA hazard identification sign remains in place. The disturbed area acreage once occupied by the waste rock pile may be used for coal storage in the future. Mr. Guy's certification stamps meet the requirements of R156-22-601, as mandated by the Utah Department of Professional Licensing.

Annual pond certifications for ponds 1,2,3,5, 6 and the four slurry cells are contained in Appendix "A", having been completed by Mr. Guy on October 28, 2014. All sediment ponds have sediment levels below the 60 % cleanout elevation; The slurry cells contain fine coal and water and are not sediment ponds. All impoundments are incised. No hazards or signs of instability were reported. The P.E. certifications meets the requirements of the Utah Department of Professional Licensing. (PHH, 2/9/2015)

COMMITMENTS AND CONDITIONS

The Permittee is responsible for ensuring annual technical commitments in the Mining and Reclamation Plan and conditions accepted with the permit are completed throughout the year. The Division has identified these commitments below and has provided space for you to report what you have done during the past year for each commitment. If additional written response is required, it should be filed as an attachment to this report.

Title: NOXIOUS WEED CONTROL
Objective: To control invasive species in and adjacent to the disturbed area. The permittee should obtain a list of noxious weeds from the county and invasive species from DWR.
Frequency: Ongoing treatment. Report annually
Status: Ongoing
Reports: Summarize treatment in Annual report.
Citation: MRP, Volume 1, Section 3.4.5.4 or .5, page 3-62a

Operator Comments

Past removal of Tamerisk and Russian Olive. No new removal needed in 2014.

Reviewer Comments ☒ Met Requirements ☐ Did Not Meet Requirements

Savage Services is very conscientious about weed control and does regularly treat weeds. Recently, tamarisk was noted growing along pond embankments. These plants were removed on 2/18/2015, the following day. (PB 2/17/15) I concur with the comments provided by the soils scientist. [JCH 06/30/2015]

FUTURE COMMITMENTS AND CONDITIONS

The following commitments are not required for the current annual report year, but will be required by the permittee in the future as indicated by the "status" field. These commitments are included for information only, and do not currently require action. If you feel that the commitment is no longer relevant or needs to be revised, please contact the Division.

Title: WASTE STREAM FROM PROCESSING PLANT
Objective: Provide documentation of chemical characteristics of process waste returned to site through analysis of parameters.
Frequency: Sample every 5,000 tons returned to site.
Status: Ongoing, report required if waste is returned to site. Or, state if reported in Dugout Annual Report.
Reports: Submit Laboratory analysis sheets with annual report.
Citation: MRP, Volume 1, Chapter 5, Appendix 5-2.

Title: FINAL RECLAMATION SOIL TESTING
Objective: To ensure vegetation establishment
Frequency: At final reclamation
Status: At reclamation
Reports: Discussions with DOGM and laboratory analysis reporting required at final reclamation.
Citation: MRP, Volume 1, Chapter 5, Section 542.200, page 50

Title: SEALING OF WELLS
Objective: Permanent closure of wells using measures required by DOGM to prevent access and prevent contamination of ground water.
Frequency: Seal wells when no longer needed.
Status: Ongoing
Reports: Report status when mining is terminated or wells are no longer needed.
Citation: MRP, Volume 2, Chapter 6, Section 631, page 5, and Volume 1, Chapter 5, page 46.

OPERATOR COMMENTS (OPTIONAL)

REVIEWER COMMENTS

Well S-2-GW was located on the east side of the Savage waste rock / refuse pile facility. This well required abandonment when the refuse pile was recovered as part of a BTU resource recovery operation. Permitting for abandonment was accomplished under Task ID # 4491 approved on February 13, 2014. (PHH, 2/9/2015)

REPORTING OF OTHER TECHNICAL DATA

Please list other technical data or information that was not included in the form above, but is required under the approved plan, which must be periodically submitted to the Division.

Please list attachments:

N/A

Reviewer Comments

The Permittee has submitted the Annual Hydrology quality and quantity data for all of the MRP approved water monitoring sites in each quarter during 2014 (KS).

MAPS

Copies of mine maps, current and up-to-date, are to be provided to the Division as an attachment to this report in accordance with the requirements of R645-301-525.240. The map copies shall be made in accordance with 30 CFR 75.1200 as required by MSHA. Mine maps are not considered confidential.
