Re: Ext. for Compliance of NOV's
ACT/007/007

Gentlemen:

In response to your letter of 8-20-79 we make the following comments:

1. MC717.15(1)a. Kaiser Steel proposes to construct a ditch along the Grassy Trail Creek side of the parking lot to transport runoff to the Sedimentation Pond. Kaiser requests permission to not construct a berm at this location so that in the winter time the snow can be properly removed and not create a safety hazard.

2. MC717.17(1) We are in the process of securing a topo-photo map to assist in the proper design of the diversion structures. Because of the complex nature of the problem it is necessary and we hereby request an additional 60 day extension.

3. MC717.17(2) We have previously submitted plans of the proposed sediment ponds for your review.

4. MC717.17(3) The surficial material stockpile will be stabilized with a vegetative cover when we apply the seed mulch to the other areas in the late fall.

Sincerely,

KAISER STEEL CORPORATION

John S. Huefner, P.E.
