**Subject:** UT-DOGM Approved Permit Revision Submitted via CD  
**CC:** "Foster Kirby" <FKirby@osmre.gov>, "Phyllis Schwartz" <PSchwartz@osmre.gov>

---

Mr. Haddock:

In the recent months, more and more UT-DOGM approved permit revisions have been submitted to OSM in an electronic format on compact discs (CD) and has resulted in a filing and maintenance problem here in our office.

In order to maintain a current and up-to-date version of Utah permits on Federal lands, without a paper or hard copy for insertion the Permit Application Package (PAP) for some mines are becoming out of date.

A case in point is the recent submittal for Degas Well G-22 and Access Road at Canyon Fuel Company, LLC's Dugout Canyon mine, Task ID# 3068. The CD submitted only contained revised text, figures and plates for insertion into the approved PAP and not an updated copy of the entire approved PAP.

OSM is requesting your assistance in how it can maintain a current and up-to-date version of the approved PAP without having approved submittals filed in numerous and potentially unrelated places.

Please advise.

**Carl R. Johnston**
