RE: Approval of Manshaft
Sediment Pond
Sunnyside Mines
ACT/007/007, Folder No. 4
Carbon County, Utah

Dear Mr. Pearce:

Pursuant to your phone call of December 28, 1983 regarding approval on the manshaft sediment pond, the Division has reviewed the sizing specifications for the pond and spillway device.

Some of the design calculations performed by the Division reveal small differences between your submittal and DOGM calculations. However, the pond and spillway device appear adequately sized to meet the regulatory requirements.

This approval will allow you to proceed with installation of the new spillway device.

Other aspects beyond the pond and spillway sizing will be covered in the Draft Technical Analysis currently being performed on the Sunnyside Mine Plan.

Sincerely,

James W. Smith, Jr.
Coordinator of Mined
Land Development
