RE: Icelander Wash Pond Reclamation, Sunnyside Mines, ACT 007/007

Dear Mr. Whitehead:

Per DOGM approval on Oct. 7, 1986, final reclamation of the Icelander Wash Pond was to be completed by Oct. 31. As I discussed with Phil Ralphs last week Kaiser has completed the final reclamation on this area using the Pinyon-Juniper/grass seed mix described in the Sunnyside Mines permit ACT 007/007, with minor modifications agreed to by Lynn Kunzler (letter Oct. 23, 1986). These reclamation activities were completed on Oct. 31, using the services of B and R Reclamation. The areas were ripped, fertilized, hydroseeded, mulched, and tacked. Fertilizer was applied at a rate of #200/ac 16-16-8, as indicated by site specific soil testing.

Kaiser has sincerely appreciated your cooperation and assistance in this matter. If you have any questions, or comments concerning this or any other issue, please feel free to contact Brad Bourquin, Sunnyside Mines new Chief Engineer, or myself.

Sincerely,

Susan Hasenjager
