RE: Permit Change, Kaiser Coal Corp., Sunnyside Mine, ACT/007/007, Folder #2, Carbon County, Utah

By letter dated April 25, 1988 Kaiser Coal Corporation requested a permit change. Kaiser has leased 72.5 acres of patented surface estate to Sunnyside Power for a small power generating plant. This is the reason for the requested change.

On June 21, 1988, Carl Winters, KCC representative, and the undersigned walked the easterly and southerly boundaries of the leased parcel. The parcel can be descriptively described as bounded on the east by the slurry pond road, on the north by the railroad tracks, on the south by a fence line and an identified line lying south of the pinyon/juniper trees and on the west by an unmarked line across a steep hillside. The SW line ties into 1/16 brass cap common to Sections 6 & 7, Twp. 15S, R14E, SLPM which was found.

The 72.5 acre parcel is not disturbed. Vegetal cover on the parcel consists of pinyon/juniper, shadscale and grass on the west, a small native hay field in the central portion and grass/brouse on the easterly portion. The easterly portion has an excellent stand of grass adjoining the native hay field and may at one time have been disturbed as a hay field. Further, there is no evidence of noncoal or coal waste on the parcel.
