Subject: Electronic Permitting – Registration Form for Access to Secure File System

Dear Mr. McCourt:

As you are aware, the Division is developing an electronic permitting process for our Coal Program. We hope to make it a smooth transition for all, and will start slowly phasing into this new process. The first step we would like to accomplish is the registration of all authorized company representatives who will have permission to file electronic applications with the Division. By registering, company representatives will be given login credentials to gain access to the Division's secure file system to view and upload applications and reports.

Enclosed is a Registration Form. Please have each individual that will be responsible for filing electronic applications or reports complete, sign and date the form. Also, each form must include a notarized signature from a company officer. Please have forms returned to the Division by **October 29, 2010**. Once login credentials are established, a letter will be sent with login and password information. At that time we will also provide details about the next step in our electronic permitting process. This will include working with each mine, individually, to make their entire Mining and Reclamation Plan available electronically.

If you have any questions, please feel free to call Angela Nance at (801) 538-5264.

Sincerely,

Dana Dean
