**Subject:** Bob Steele

Received a call from Mark Sensibaugh (USFS--Uinta NF) about the activities of Bob Steele in the Nephi District. He stated that Mr. Steele had failed to pay for his special use permit on the Gardner Canyon Mine (S/023/015) and the Forest Service was in the process of revoking this permit. Mark figured that they would be back in court very shortly.
He also stated that the Dansie-Steele mine in Levan Canyon (S/023/016) could be a problem. Because the mine is located on both USFS and private ground he said the forest service was relying on UDOGM to monitor the extent of disturbance in this area. He stated that his estimate was that this mine had exceeded the five acre threshold (we probably need to schedule a visit).
He said that the Steele-Dansie duo was also scratching around a area called Salt Creek, South of Nephi, and would probably need some supervision in this undertaking. He never mentioned whether what the land status was in this area. Wayne mentioned that Bob had indicated that he was coming with a new mine permit, perhaps this is the place.
