II. Mining and Reclamation

1. Was the mine active during the past year? Yes ☑ No ☐
2. If active, how much ore or mineral was mined? 1,000 lbs.

3. How much **additional acreage** was disturbed during the past year? None

4. Briefly describe any new or additional surface disturbances that occurred during the past year. This description should include the type of work performed, and volume of material moved.

Nothing New

5. How much acreage was **reclaimed** during the past year? Work is in progress

6. Briefly describe the reclamation work performed during the past year. This description should include methods employed, and an evaluation of the results.

Reasonable Measure; re-seeding with drought-resistant crested wheat grass seed, of the dump, and the recreationist's motorcycle trail across the property made by racers with a BIM permit for their race which has caused terrific erosion!

7. What is the **total disturbed acreage** at years end? Not more than one acre.

8. Briefly summarize any mining and/or reclamation plans for the upcoming year.

Expand and lengthen existing cuts and remove overburden to continue development of ore vein --- and mine ore found. Maintain existing access roads, and seed road shoulders with crested wheat seed to prevent erosion - also overburden dump

NOTE: Section III., "Additional Information" applies only to **large mining operations**.

III. Additional Information

1. An updated surface facilities map should be attached if there have been significant changes since the previous map was submitted.
