Dear Henry:

Re: NOV92-32-14-1, Failure To Treat The Coarse Refuse Seep

Attached is a copy of the cover letter that Sunnyside Coal Company has submitted to the Utah Bureau of Water Pollution Control asking for an amendment to our UPDES Permit UT0022942. The amendment requests that Coarse Refuse Seep (CRS) be added to our current list of UPDES discharge points.

It is our hope that this, along with treatment of the seep, will satisfy the remedial actions for abatement of the above NOV. Thank you.

Sincerely,

Pete Hess

Dear Mike:

Sunnyside Coal Company is applying for an amendment to our UPDES permit in order to abate a Notice of Violation issued by the Utah Division of Oil, Gas & Mining on the Coarse Refuse Seep (CRS). Although the sample point is located on Sunnyside Cogeneration Associates' property, it is included in the Utah Division of Oil, Gas & Mining's Permit ACT/007/007 which belongs to Sunnyside Coal Company. The DOGM inspector issued NOV92-32-14-1 based on DOGM Regulations R645-301-751, R645-301-752, and R645-301-731.121.

Sunnyside Coal Company has sampled this water source for several years at the base of the Coarse Refuse Pile (CRS) as well as at the Coarse Refuse Boundary (CRB), which is where the flow leaves SCA's property. Attached are the results of the analyses of those samples for both CRS and CRB.

All other discharge points on Sunnyside Cogeneration Associates' lands are in their name, having been transferred several years ago.

The location on the proposed discharge point is Latitude 39° 32' 31" and Longitude 110° 23' 41". It is located in Sunnyside, Carbon County, Utah. A location map is attached.

Sincerely,

Pete Hess
Environmental Coordinator
