Dear Mr. Fielder:

Re: Prevention of Coal Fine Deposition into Undisturbed #2 Canyon Channel, Sunnyside Coal Company, Sunnyside Mine, ACT/007/007-92C, Folder #2, Carbon County, Utah

Required hydrologic information relative to the above-noted amendment is deficient. Drainage calculations that demonstrate the adequacy of the capacity of the covered drainage, riprap sizing, peak flows, and decant runoff calculations must be submitted. All hydrologic aspects of this amendment must be addressed in a complete and adequate manner.

It would be helpful in preparation of permit amendments to enclose **all** related information and not merely refer to other information. A complete and comprehensive text aids the Division in the review process.

Please submit all required information by September 15, 1992.

Sincerely,

Pamela Grubaugh-Littig
