The diversion will need to be properly designed according to the requirements of R645-301.746.212. The hydrology section of the Mining and Reclamation Plan (MRP) will need to be amended to include changes that result from adding the diversion. The MRP amendment should include appropriate changes to designs, maps and narratives. Hydrology maps 731.720a and 731.720b need to be updated to include the new diversion, represent the current hydrology on site, and to more clearly depict the names and locations of all ditches, diversions, and culverts.
