Mine Site Evaluation Inspection Report

26. State Permit Number: IN 0 015 002

27. Date of Inspection (YYMMDD): 861118

28. Yes ☐ No ☐ Do mining and reclamation activities on the site comply with the plans in the permit? If no, provide narrative to support this determination.

29. Indicate number of complete and partial inspections conducted by the State to date for this annual review period:

29a. 01 Number of Completes — 29b. 00 Number of Partials

30. Indicate number of complete and partial inspections required by the State during this annual review period:

30a. 01 Number of Completes — 30b. 00 Number of Partials

31. Has inspection frequency been met?

31a. Yes [X] No [ ] Completes — 31b. Yes [X] No [ ] Partials

32. FEDERAL ENFORCEMENT INFORMATION. [Enter violation number. Check appropriate box(es)]

	Ten-Day Notice No.	Notice of Violation No.	Cessation Order No.	Violation Codes
A				Authorizations to Operate
B				Signs and Markers
C				Backfilling and Grading
D		N/A		Highwall Elimination

Company Western State Minerals
4975 Van Gordon
Wheat Ridge, CO 80033
Inspector Henry P Austin
Others N/A

Mine J. King
Permit # INA/015/002
Date: 11-18-86
Inspection Type Complete, routine

Conducted unaccompanied oversight inspection of this reclaimed site.

The approved permanent impoundment is retaining water, and there is no sign of discharge from this structure.

Mike O'Donnel of Western State Minerals has been conducting the monthly required inspections on site. One year of monthly insp. have been conducted, and quarterly inspections will begin in January. According to telephone correspondence with Mr. O'Donnel, he met on site with DOGM hydrologist(s) to discuss plan for additional stabilization of major drainage way. Plan was submitted last week and includes rip-rap stretches and drop structures to reduce runoff velocities. There is erosional development on west facing slope, and also ~~on~~ south facing slope bottom adjacent to major drainway which should be regraded/reseeded when work on drainage way is started.

The entire reclaimed area has been fenced. Annual subsidence monitoring was conducted 4-26-86, with only minor measurable subsidence according to Mr. O'Donnel. There ~~are~~ is no continuing surface/ground water monitoring required.

Reveg. success is minimal thru this 1st year, mostly weed volunteers evident so far. Shrubs which were planted looked healthy, in general.

No additional surface tension cracks were ~~available~~ evident in subsidence area.

Performance standards indicated as not applicable do not exist on site.
