Dear Mr. Temnikov:

Enclosed is the monthly progress report for December 1980, on the study to determine the "Effects of Coal Development on Wildlife in Southeastern Utah". Work is proceeding as planned. Winter conditions are very dry and represent a situation considered to be abnormal.

Thank you for your cooperation on this project.

Sincerely,

STUDY TO DETERMINE THE EFFECTS OF COAL DEVELOPMENT ON WILDLIFE IN SOUTHEASTERN UTAH

Monthly Report for December 1980

During the month of December, all experimental and control transects were monitored for big game tracks. Also a draft of the final report for Phase I-a of the "Study to Determine the Effects of Coal Development on Wildlife in Southeastern Utah" was worked on.

During the month of January all experimental and control transects will be monitored for big game tracks. Also the overland coal conveyor belt will be monitored for deer crossing. The final report for Phase I-a of the study will be submitted at the end of the month for review by the cooperators of the study.

Raw data forms for the months of November and December have been enclosed for Eureka Energy Company.

No raw data in S.L.C.
