Inspection Memo
to Coal File:

RE: Hidden Valley Mine
Soldier Creek Coal Company
INA/015/007
Emery County, Utah

A partial inspection at the above mentioned minesite was conducted by Barton Kale of the Division on May 10, 1983. The purpose of the visit was to insure that no recent mining activity has taken place.

The area has not been recently disturbed and no signs of mining activity were found. The portals were closed and sediment controls in place during the last inspection were still existing.

The topsoil stockpile is still doing well. It is still uncertain if spring moisture will continue to establish stable vegetation.

No problems were evident at this time.
