3. Topsoil

Topsoil stockpiled alongside the RR tracks at the load out is stable.

4.a Hydrologic Balance: Diversions

Culvert C-14-42 at the loadout carrying water to creek. Surface of reclaimed sections are stable.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Loadout sediment pond almost dry, see photo.

4.c Hydrologic Balance: Other Sediment Control Measures

At the mine site, I performed maintenance on the lowest water bar on Terrace A and installed two new water bars downstream of this one, see photos attached.

4.d Hydrologic Balance: Water Monitoring

The results of the water sample taken from a seep during low flow at the mine site can be found in the White Oak Internal Folder.

7. Coal Mine Waste, Refuse Piles, Impoundments

The west bank in reach 4 on the reclaimed Whiskey Creek (location of sediment pond waste at mine site) is stable.

8. Noncoal Waste

Picked up metal waste from along Terrace A and took it to the Scofield dumpster.

9. Protection of Fish, Wildlife and Related Environmental Issues

I took photographs of thistle along the road outslope and at the mine site to include in a presentation to the Skyline Cooperative Weed Management Board at their next meeting (Dec 5). Thistle is dominant on the reclaimed C-14-42 at the loadout.

10. Slides and Other Damage

Sinkholes are stable.

16.a Roads: Construction, Maintenance, Surfacing

Last month, Mr. Robert Aycock (Hammond family landowner) requested DOGM evaluate possible treatments to stabilize the road.

2. Signs and Markers

Identification signs are at the gates to the property.

3. Topsoil

All topsoil was used in reclamation.

4.a Hydrologic Balance: Diversions

Diversions are opened with no signs of erosion from the winter.

4.c Hydrologic Balance: Other Sediment Control Measures

The reclaimed site is pocked for sediment control.

8. Noncoal Waste

The site was clear of non-coal waste materials.

10. Slides and Other Damage

No slides or damage was noticed during the inspection.

12. Backfilling And Grading

The sites are completely reclaimed. All backfilled material was used.

13. Revegetation

his site in my judgment is highly vegetated in the summer.

19. AVS Check

AVS checks are made in Salt Lake City.

21. Bonding and Insurance

The bonding amount is \$490,100. The insurance policy will expire on Dec. 13, 2012. The bonding amount will be adjusted in the near future.

1. Permits, Change, Transfer, Renewal, Sale

The current DOGM permit for C/007/022 remains in effect through August 6, 2014. The SPCC plan was last certified by Mr. Dan Guy, P.E., in March of 2010.

2. Signs and Markers

Identification sign was at gate to permit area.

3. Topsoil

There are two topsoil piles. These soil piles were protected by berms. There were no signs of wind or water erosion.

4.a Hydrologic Balance: Diversions

Several diversions were recently cleaned out.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Sediment ponds #1 and #2 were cleaned out this summer. The sediment ponds were inspected on September 21, 2012. No hazardous conditions were reported. No ponds were discharging during the inspection. This was the annual sediment pond inspection. It was P.E. certified.

4.d Hydrologic Balance: Water Monitoring

Water monitoring reports were submitted to the Division.

4.e Hydrologic Balance: Effluent Limitations

No discharges for the third quarter of 2012.

7. Coal Mine Waste, Refuse Piles, Impoundments

The refuse pile was inspected by a P.E on September 21, 2012. No hazardous conditions were reported.

8. Noncoal Waste

The loadout was clear of non-coal waste materials.

16.a Roads: Construction, Maintenance, Surfacing

Roads were in good conditioning and were watered for dust control.

16.b Roads: Drainage Controls

Road diversions were opened and functioning as designed.

18. Support Facilities, Utility Installations

No new facilities since the last inspection.

19. AVS Check

AVS checks are made in Salt Lake City.

20. Air Quality Permit

DAQE-AN11793000-7-08

21. Bonding and Insurance

The Permittee provided the Division with a general liability insurance re-newal form on April 1, 2013 from Marsh USA Risk and Insurance Services. The coverage will automatically re-new on April 1, 2013. Coverage amounts for each occurrence and general aggregate categories are adequate. Coverage for explosives damage is not specifically excluded. The cancellation clause meets the Division notification requirements contained within the policy. The posted bond amount to ensure reclamation of this site is \$ 2,525,000. The surety (Liberty Mutual Insurance Company) has an A.M. Best rating of "A", as of December 31, 2010.

1. Permits, Change, Transfer, Renewal, Sale

The Columbia / Bronco Energy well is discussed in Chapter 2 of the Horizon Mine (C/007/020) MRP, (See Chapter 2, page 2-2, Section 112.340). The site was permitted as a minor coal exploration, and completed as a water monitoring well.

2. Signs and Markers

The Permittee identification sign is in place at the terminus of the access which is off the Horse Canyon / Range Creek access road.

3. Topsoil

With the exception of the water monitoring well, the site has been reclaimed.

4.c Hydrologic Balance: Other Sediment Control Measures

Sediment control is provided by surface gouging. There is no visible evidence that sediment is leaving the disturbed area.

4.d Hydrologic Balance: Water Monitoring

MW-1 is not being monitored for groundwater quality. Horse Canyon Creek was observed as dry at the following locations; at the Emery County bridge, the Geneva Mine buildings, the Geneva powder magazines, and the Geneva water tank. The only observed flow was at the Turtle Canyon road culvert on the discharge end. The flow appeared to be less than 2 GPM.

15. Cessation of Operations

There has been no change to the operational status of this monitoring well.

19. AVS Check

As far as is known, all senior management with America West Resources, LLC is unchanged.

21. Bonding and Insurance

The reclamation cost and bond were increased to \$ 6500 in April of this year. This is a cash bond, payable to the Division and OSM.

1. Permits, Change, Transfer, Renewal, Sale

The current State of Utah permit issued by the Division remains in effect through September 1, 2014.

2. Signs and Markers

The disturbed area / permit area is delineated by the chain link fence which was installed co-linear with the permit boundary.

3. Topsoil

Both storage piles are surrounded by berms about the toe. Topsoil storage signs are in place. Vegetative growth on the piles is minimal, due to the quality of the soil.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Both the East and West ponds contained some water. Minor rilling was observed on the inslopes of the incised ponds. The 4th Quarter and Annual Impoundment inspection and certification is due in December, 2012. The Permittee plans to move the annual cerification to late spring so that, should the ponds require cleaning or repair for some other reason, the work can be more easily accomplished in warm weather. Both pond spillways were capable of functioning as designed. No compliance issues were identified.

4.d Hydrologic Balance: Water Monitoring

The site has one water monitoring well; monitoring will not be required until the site enters into reclamation.

4.e Hydrologic Balance: Effluent Limitations

Neither pond has ever discharged. As observed this day, the water elevation in both ponds was well below the discharge elevation of the spillways. The facility has a UPDES Multi-Sector General Permit for Storm Water Discharges (UTR000685) which was renewed for five years, effective January 1, 2012.

7. Coal Mine Waste, Refuse Piles, Impoundments

All coals processed through the dry air-jig process are blended and shipped as high quality or low quality coals. There is no refuse being created or stored on site.

9. Protection of Fish, Wildlife and Related Environmental Issues

No wildlife was observed during today's inspection. Numerous tracks of deer, antelope and raccoons were observed in the mud of the pond bottoms.

20. Air Quality Permit

The Permittee had made several applications of water on the operational haul roads prior to todays inspection.

Permit Number: C0070045
Inspection Type: COMPLETE
Inspection Date: Wednesday, November 07, 2012

21. Bonding and Insurance

The Division completed a mid-term permit review of the COVOL MRP including a recalculation of the reclamation cost in June of 2011. The amount of posted bond is \$ 206,000; the reclamation cost is of the same amount escalated through 2015.

Report summary and status for pending enforcement actions, permit conditions, Division Orders, and amendments:

Mining is taking place in the North end of Pit #6. A portion of this seam was blasted on 30-Oct-2012 to loosen the seam so that it can be extracted. The North end of Pit #7 still needs to be mined. Overburden is being removed from the South of Pit #6 and the North of Pit #7 where they intersect each other.

1. Permits, Change, Transfer, Renewal, Sale

The current DOGM permit C/025/0005 was issued effective 11/08/2010 and expires 11/08/2015.

-Certificate of Insurance policy number MNG880007-01, issued 06/01/2012 and terminates 06/01/2013.

-UPDES permit # UTG040027 effective 05/01/2009 and expires @ midnight 04/30/2013.

-Air Quality permit DAQE-AN0140470-02-10, issued November 10, 2010.

-SPCC Plan dated 05/04/2011. The Plan is P.E. certified, stamped, signed and dated by a Utah P.E.

2. Signs and Markers

The mine identification signs are posted on the fence at the entrance's into the permit area. The signs contain all of the information required by regulation. The signs are large enough to make them legible as you enter the mine site.

3. Topsoil

Topsoil was actively being stripped off the top of Pit #8 & #9 during the complete inspection. The topsoil is being placed into topsoil pile #4.

4.a Hydrologic Balance: Diversions

There is an area North of the diversion that leads to pond #3 that has been seeded and reclaimed.

4.b Hydrologic Balance: Sediment Ponds and Impoundments

Third quarter 2012 pond inspections were completed on 9/25/2012. The report is P.E. certified, dated, stamped and signed. The reports in the future need to include the elevation of the existing sediment level. To date this elevation has not been part of the report. A reminder was issued on the last complete inspection as was on this current inspection. Kirk Nichols indicated that all of the ponds had water in them during the inspection which made it prohibitive to acquire the existing sediment elevation. .

4.e Hydrologic Balance: Effluent Limitations

Reviewed the July, August and September 2012 discharge monitoring reports as part of the complete inspection. There were no discharges during the referenced month's.

5. Explosives

The following blasting records were reviewed:

Blast #6 16-Jul-2012 49,761 lbs
Blast #7 17-Jul-2012 1,922 lbs
Blast #8 18-Sept-2012 23,638 lbs
Blast #9 27-Sept-2012 4,898 lbs
Blast #10 11-Oct-2012 4,805 lbs
Blast #11 12-Oct-2012 6,786 lbs
Blast #12 30-Oct-2012 7,160 lbs

Each blast record had a drawing showing the hole pattern and delays used.

6. Disposal of Excess Spoil, Fills, Benches

The excess spoil pile was inspected for the third quarter 2012 on 9/25/2012. The report is P.E. dated signed and certified stamped.

20. Air Quality Permit

DAQEAN0140470002-10 ISSUED November 10, 2010.

21. Bonding and Insurance

Bond #1057708, October 22, 2010, for \$6,045,000.00.

**FINDINGS of FACT,
CONCLUSIONS OF LAW
AND ORDER**

CAUSE NO. C/015/025

---ooOoo---

On July 12, 2012, the Division of Oil, Gas and Mining (Division) held an Informal Assessment Conference as provided for by R645-401-700 Utah Administrative Code (2011) in response to the written request by Castle Valley Mining, LLC (Castle Valley) to review the fact of violation and fine assessment for Notice of Violation 10096 (NOV), issued to it on May 24, 2012 for operations at the Bear Canyon Mine, C/015/025, Carbon County, Utah.

ISSUES

The Division in its Notice of Violation found that rules R645-301-731.100, 120 and R645-301-731.212 and 223 had been violated. These rules require that surface and groundwater monitoring be conducted according to the plan approved under R645-301-731.200 et seq, and that complete records of water monitoring data be submitted every 3 months. The Division assessed a fine of \$352.00.

PARTIES

Dana Dean, Associate Director Division of Oil, Gas and Mining served as the hearing officer. The hearing was conducted as an informal adjudicative proceeding. April A. Abate, Division Hydrologist presented the facts and arguments in support of the Notice of Violation, Joe C. Helfrich, Assessment Officer, presented the arguments concerning the determination of the assessment amount. Messrs. Corey Heaps and Jaren Jorgensen represented Castle Valley Mining, LLC and presented the position and arguments on its behalf.

No recording or transcript of the conference was made.

FINDINGS OF FACT

Based on the information provided at the conference, the statements presented by those speaking, and on information in the files of the Division the following Findings and Conclusions were made.

1. The Request for an informal assessment conference was delivered to the Division on June 19, 2012.
2. Notice of the Informal Assessment Conference was provided as required on July 2, 2012.
3. Upon review of the fourth quarter water monitoring data provided by Castle Valley for the Bear Canyon Mine, April Abate found it to be deficient for the following reasons:
 - a. Castle Valley failed to perform quarterly sampling duties within the month specified in the Mining and Reclamation Plan (MRP), Chapter 7 Table 7-14. Fourth quarter sampling activities are required in October, not December of each year.
 - b. Castle Valley failed to provide a complete set of operational parameter data for spring sample SBC-14 during the fourth quarter 2011 sampling event.
4. Because this is not the first time that Castle Valley failed to collect water in the proper month or provide a full set of data for SBC-14, Ms. Abate wrote the NOV.
5. Mr. Heaps explained that Castle Valley desires to do everything according to the MRP and to stay in compliance with all of the Coal Rules.
6. Mr. Jorgensen explained that he had been open and responsive to everything the Division has communicated to him. He admitted that he had not been sampling according the requirements in the MRP, but explained that it was not purposeful. He said that he now understands the sampling requirements and will diligently follow them. He also suggested that there may be a glitch in our water quality database that caused some of the parameters for SBC-14 not to show up. The Division has been unable to repeat the error, but April is willing to work with him over the next couple of quarters to ensure that the data is properly entered the first time.
7. After some discussion, Castle Valley decided not contest the fact of the violation, but did ask that the points assessed be reconsidered.
8. Both sides indicated that there is a cordial, respectful, communicative relationship between the Division and Castle Valley. They are both also willing to work together to avoid these problems in the future.

CONCLUSIONS OF LAW

1. The approved water-monitoring plan for the Bear Canyon Mine was not followed for the fourth quarter of 2011 and a full set of data was not provided for SBC-14.
2. The fact of the violation should stand.
3. Based on Mr. Jorgensen's testimony, and the actions he is taking to prevent future hindrances, the negligence points should be lowered from 12 to 10, and the good faith points should be increased from 8 to 11.

ORDER

NOW THEREFORE, it is ordered that:

1. The fact of the violation is upheld.
2. The proposed assessment of \$352.00 is now finalized at \$264.00.

SO DETERMINED AND ORDERED this 12th day of July, 2012
