RE: Act/007/009
UT 0041

Dear Mr. Smith:

In the mining permits issued by your Agency and OSM, conditions were attached that required us to respond with additional information. Since many of these conditions required additional design work they will be addressed at least 120 days prior to construction of the specific facility. However, there are conditions that we have addressed and these are submitted to you today. The attached blue table gives the condition that is being addressed and the permit package pages that were revised. The submittal pages will completely replace existing pages in the permit package.

In addition, a copy of our federal surface lease accompanies this response package. This information is submitted in response to our agreement to file with you other agency permits and approvals.

If you have additional questions, please call me.

Very truly yours,

Charles Durrett
Environmental Coordinator
