RE: ACT/007/009
Sage Point/Dugout Canyon

Dear Mr. Smith:

Sunoco Energy Development Co. is nearing the end of the permitting process and will receive a permit to mine in the near future. During the interim period between permit issuance and construction, several existing roads in the permit and adjacent areas will be used on an irregular basis for geotechnical and biological field work. These roads ford streams in several areas. In accordance with UMC 817.151c, 817.161c and 817.171c, we request approval from DOGM to use these temporary stream crossings until initial construction begins.

Please call me if additional information on the above subject is necessary.

Very truly yours,

Charles Durrett
