RE: U.S. Fuel Company
King VI Sediment Pond

Dear Mr. Jahne:

I have reviewed the plans and December 5, 1980 Hydrologic Information for the King VI Mine Area of the United States Fuel Company. The following additional information on the sediment pond should be submitted to this office for approval in conformance with the enclosed Utah Wastewater Disposal Regulations.

1. Oil skimming prior to discharge.
2. A minimum of three feet of settling at all times.
3. Expected seepage rate.
4. Embankment stability. Slopes of approximately three to one are recommended.
5. Construction specifications.

In addition, information on the slope stability at the end of the diversion ditch should be submitted.

If you have any questions regarding our requirements, you may contact me at 533-6146.

Sincerely,

Steven R. McNeal
