RE: Temporary Revegetation
Hiawatha Complex
ACT/007/011
Carbon County, Utah

Dear Ms. Semborski:

This is to confirm the verbal approval given on December 9, 1981, to use the seed mix below for temporary revegetation of disturbed areas associated with the conveyor and loadout facilities at the King VI Mine.

Conditions of this approval are to provide the Division with germination rates and/or Pure Live Seed (PLS) amounts for each species by January 4, 1982. On steeper slopes, straw mulch is to be used and either crimped into the soil or a suitable tackifier applied.

The bulk seed mix to be used will include:

Smooth brome @ 7 lbs
Orchard grass @ 6 lbs
Intermediate wheatgrass @ 6 lbs
Kentucky bluegrass @ 5 lbs
Meadow foxtail @ 5 lbs
Timothy grass @ 5 lbs
Arrowleaf balsomroot @ 5 lbs
Mountain lupine @ 3 lbs
Sweetvetch @ 3 lbs

Fifteen-twenty lbs of this mix will be hand-broadcast onto the prepared seedbed.

Should there be any problems or questions, please contact me.

Sincerely,

LYNN M. KUNZLER
RECLAMATION BIOLOGIST
