Attention: Mr. Wayne Hedberg, Reclamation Hydrologist

Gentlemen:

I am enclosing three (3) sets of Drawings EFC-133-R-1 thru R-8 for your information and distribution. I originally made most of these drawings while still wearing my plaster cast. Now, that I am once more travelling "without portfolio", I thought I'd better redo the printing so we in the present, as well as our posterity, might be able to read them. Since I started that task, your letter of June 3, 1982 arrived, so I have incorporated your remarks on stipulation 7-81-11 onto the revised drawings.

Relative to stipulations 7-81-2, 7-81-3, 7-81-7, 7-81-9, 7-81-12 and NAOC #1 of 2(82-2-5-2) I wish to say the following:

STIPULATION 7-81-2:

We have engaged Bio/West, Inc. to prepare interim and final reclamation and revegetation plans to be in compliance with the various regulations. I am sure that John Rice (Bio/West) has already talked to Mary Boucek and Tom Portle of your office on his proposed submittal and tests.

STIPULATION 7-81-3:

In keeping with the intent of your letter on this stipulation, the final reclamation plan will include the South Fork Canyon Road - with an eye to changing the submitted plan in the future.

STIPULATION 7-81-5

If this involves the 15" diameter irrigation pipe from the natural drainage uphill from the truck turn-out to the ditch on the north side of the South Fork Canyon Road - installation was completed on June 11, 1982. Sandy Pruitt probably saw that it was about complete last week. I am going to Hiawatha during the week of June 21 (hopefully) to supervise installation of the hay bale berm atop the coal pile cut.

STIPULATION 7-81-7:

I understand that a contract for finish paving of the South Fork Canyon Road is to be let soon by U.S. Fuel Company. Upon completion of this work, I can address final embarkment slopes. Techniques for revegetating steep grades are to be included in the interim revegetation plan addressing Stipulation 7-81-2 above.

June 16, 1982

STIPULATION 7-81-9:

I anticipate that this stipulation will be adequately addressed in the report submitted to Tom Portle from Bio/West, Inc. by mid-July.

STIPULATION 7-81-12:

A section showing proposed refilling of the diversion ditch along with a note on Drawing EFC-133-R-6 Rev. 2, enclosed, addresses the reclamation of the ditch. Revegetation of the ditch will be mentioned in the final revegetation plan being prepared by Bio/West, Inc. That part of the conveyor adjacent to the road will be included in the road reclamation plan addressing stipulation 7-81-3 above. The Company objects to having to reclaim the King VI Mine yard. I am attempting to get a clarification of its position as soon as possible for your review.

NAOC #1 of 2 (82-2-5-2):

I sent Sandy Pruitt three (3) copies of Drawing EFC-133-R-8 showing the revised sedimentation pond on June 9, 1982. She has probably already shown them to you. I also sent along a proposed specification for rebuilding the pond.

I understand from Bio/West, Inc. that the proposed interim and final revegetation plans will be mailed out today. Copies should get to Mary Boucek by Monday, I should guess.

Very truly yours,

Charles J. Jahne
