Hello All,

The Division is currently experiencing technical problems with the electronic water quality database. We are exploring our options in how best to rectify the situation in both the short and long term.

However, at this point we felt it prudent to instruct you to not enter anymore water monitoring data into the database. Please continue to collect the required water monitoring data as usual, but do not attempt to enter the data into the database until further notice. This will affect required data submission deadlines. The Division will extend the deadline and give a firm new date when the database is fixed.

If you have any questions, please contact the assigned hydrologist for your site or Steve Christensen at [\(801\)538-5350](tel:8015385350).

Thank you for your patience.

--
