Good morning,

We're pleased to report that the water quality database is up and running again. Division staff have been working with the database internally and have not encountered the issues that were causing problems earlier this year. We appreciate your patience while we worked through this process of repairing the system.

The goal now is to try and get caught up as painlessly and as efficiently as possible. To that end, please submit the required water data for 2nd quarter 2013 by October 31st. We apologize for the inconvenience our system shut down has caused. We're hopeful that a full month will be adequate time for everyone to get caught up.

Missing data for 4th quarter 2012 and 1st quarter 2013 will be handled on a case by case basis by the assigned hydrologist for your site. They will be contacting you in the coming days to let you know what data may be outstanding and will work with you to resolve any issues.

Thanks again for your patience. If you have any questions, please call Steve Christensen at [\(801\)538-5350](tel:8015385350).

Regards,  
Steve
