Ms. Susan Linner, Permit Supervisor
Division of Oil, Gas and Mining
3 Triad Center, Suite 350
Salt Lake City, Utah 84180-1203

Dear Ms. Linner:

Enclosed are revisions to our submittals regarding TDN 88-2-116-2 as per your letter of January 13, 1989.

Appendix III-17 on small area exemptions has been changed to include the area of each site. The total current disturbed area in the permit has been included and each site is delineated on a contour map.

Diversion ditch designs have been revised to show the flow velocities resulting from peak runoff from design storms. Erosion control structures already exist in some of the ditches, however, due to snow cover, these structures cannot be accurately identified at this time. We will submit information on these structures once the snow has melted. This was discussed with Mike DeWeese by telephone on January 25.

Eight copies of these revisions are enclosed.

Sincerely,

Robert Eccli
