FROM: Henry Sauer, Reclamation Soils Specialist

Re: Technical Deficiency Review, Federal Lease Tract Addition, Beaver Creek Coal Company, Trail Mountain #9 Mine, ACT/015/009, Folder #2, Emery County, Utah

Synopsis

The permittee has submitted the response, dated November 15, 1990, to the Division's Initial Completeness Review. The Federal Lease Tract application may be considered complete. However, the following revisions must be made to consider the application technically adequate.

Analysis and Recommendation

R614-301-200 Soils-(HS)

The permittee states that the U.S.D.A./Soil Conservation Service has given verbal confirmation to the permittee that the new lease addition contains no prime farmland. Written verification of this finding will be included as Appendix 8-1(C), upon receipt. This section may be considered complete and technically adequate.

R614-301-600 Geology

624.220 The applicant must specify the constituents and methodology of the roof and floor analysis. This section is complete, but not technically adequate. The operator must amend this section prior to permit approval.
