Ms. Jean Semborksi
Environmental Coordinator
U.S. Fuel Company
Hiawatha, Utah 804527

Dear Ms. Semborski:

Re: Mid-Permit Term Review, U.S. Fuel Company, Hiawatha Mines Complex, ACT/007/011, Folder #2, Carbon County, Utah

On May 19, 1989, the Division notified you by letter of the initiation of a Mid-Permit Term Review (MPTR) on the Hiawatha Mines Complex. U.S. Fuel Company (USF) was required to address four areas of deficiencies in the plan, and commit to a schedule for reorganization of the existing Mining and Reclamation Plan (MRP). To date USF has addressed three of the issues adequately (see attached memos). A comprehensive set of maps showing permit and disturbed area boundaries has not been submitted to date. However, the Division will allow this to be done in conjunction with the permit reorganization.

USF must still commit to a schedule for resubmittal for the MRP, in order for the MPTR to be determined complete. Please submit your proposed schedule (including dates for resubmittal of maps) by October 6, 1989.

It is suggested that, where possible in reformatting the MRP, the chapter outline of the proposed new rules is followed. It is anticipated that the new rules will be in place prior to expiration of your current permit. Reformatting under the new rules format at this time could save another major reorganization effort in two years.

Also enclosed with this package are some specific comments and guidelines relating to reorganizing the hydrology and soil sections of the MRP.

Please don't hesitate to contact me if I can be of any assistance.

Sincerely,

Susan C. Linner
