RE: REQUEST FOR AN AMENDMENT TO: CONSTRUCT A BLOWING FAN IN THE EXISTING ACCESS PORTAL, PUMPHOUSE AND WATER TANK AND NEW ACCESS PORTAL; REMOVE FUEL STORAGE AREA AND EXISTING FAN; INSTALL CONCRETE PORTAL LINERS IN SOUTH PORTAL, OLD FAN PORTAL, NEW ACCESS PORTAL AND EXISTING OR ~~OLD ACC~~ESS PORTAL; PACIFICORP, TRAIL MOUNTAIN MINE, ACT/015/009, EMERY COUNTY, UTAH

#2

Dear Ms. Grubaugh-Littig:

Following PacifiCorp's acquisition of the Trail Mountain Mine several modifications and additions are needed to allow future mining and development.

These modifications and additions consist of:

1) Construction of a blowing fan and concrete portal liner in the existing access portal.

2) Construction of a pumphouse and water tank to supply water underground for the mining operation.

3) Construct a new access portal and concrete portal liner between the existing fuel storage area and belt portal.

4) Remove the existing fuel storage area to allow for construction of the new access portal.

5) Remove the existing fan and line the portal with a concrete liner, allowing this portal to now become a return portal.

6) Install a concrete portal liner in the existing south portal, allowing this portal to now become a return portal.

Additional disturbance of 0.17 acres is necessary. These areas are indicated on the Site Plan Map.

Please find enclosed for your review a site plan map with corresponding cross-sections, construction drawings for the new blowing fan, pumphouse and water tank. The construction drawings for the new blowing fan, pumphouse and water tank are provided for your information but are not to be included in the MRP.

In addition please find enclosed the following revised pages:

Chapter 3 - Table of Contents and List of Appendices;

Page 3-2, revised 6/4/93;

Two pages, revised 6/4/93, from Appendix 3-4;

Appendix 3-9 for inclusion in the MRP upon approval of the amendment;

Table 3-3, Surety Bond Estimate - Pages 3-63, 3-64, and 3-65 and Table 3-4, Reclamation Cost Breakdown for Reclamation Bond - Page 3-69, revised 6/4/93.

Figure 3-1 - Surface Facilities Map will be revised and submitted after final construction to indicate the actual placement of the facilities.

Reclamation costs have been revised to cover this amendment bringing the total cost to $749,725. The existing Bond of $700,000 will be increased sufficiently to cover the projected reclamation costs.

Please feel free to contact Karl Houskeeper or myself at 653-2312 if you have any questions or require further information.

Sincerely,

Val Payne
Sr. Environmental Engineer
