INSPECTION REPORT COMMENTS
(continuation sheet)

PERMIT NO. ACT/007/011 INSPECTION DATE October 22, 1991

(Comments are Numbered to Correspond with Topics Listed Above)

3. Topsoil -

The topsoil pile was inspected for erosion from wind and water. The piles were intact with properly built berms, and the vegetative cover has prevented water erosion. This will most likely be the last visual inspection (observation) prior to snowfall.

4c. Sediment Ponds and Impoundments -

The sediment ponds were inspected for erosion of outlets, inlets, and embankments. The inlets were reconstructed due to the late summer rains. There was no discharge from the ponds during the inspection.

11. Contemporaneous Reclamation -

U.S. Fuel has removed the belt transfer building at Middle fork #4 and #5 mine. This was part of the bonding. The company is reviewing the possibility of reclaiming sections of the disturbed property on a schedule to reduce their liability.
