August 16, 1983

Memo to File:

RE: Rush Valley Enterprises, Inc.
Tub Hill Mine
ACT/045/015
Tooele County, Utah

On July 29, 1983, Susan Linner and Tom Portle of the Division visited the DOE to ascertain its status. No activity of any kind appears to have occurred since July 9, 1981.

An inclined cement pad (from 2 directions) would cause leachate to reach a low point from which it would proceed to the resident "black box". The process building, the pad, abandoned semi trailer and a graded disturbance (old pit?) were all in the same state as shown in photos taken July 9, 1981.

THOMAS L. PORTLE TLP
RECLAMATION SOILS SPECIALIST
