State Contract # 986739 Goldstrike Reclamation and Monitoring

Correspondence with BLM and DWR

Doug, I went out to the mine site early this morning. The rain gauge

at Guzzler # 2 showed no rain since last month. The guzzlers were both about 4.5 inches from being full. I counted about 20 cows at the heap land application area.

The heap off-flow was down to about 2.5 GPM. The East Fork is dry.

I saw one Chuker in the land application area. They haven't been using the guzzlers. Most or the main road had been bladed. The mine road is very rough. It appeared that the site has had very little activity since last month.

I talked to Bruce Bonebrake with DWR about planting some more Chukers and he wasn't interested. He said domestic raised usually don't survive. So we'll wait and see if they take off now that the guzzlers are working well.

The cows are cleaning up the area around the land application area.

That's all for this month-

Dan Slyter
